FLORIDA HOLOCAUST MUSEUM

CASE STUDY:
Florida Holocaust Museum

CHALLENGE:

The Florida Holocaust Museum is a non-profit organization that was working with an IT service provider that didn't have the skillsets to keep up with their ongoing needs. They lacked an up-to-date infrastructure to support its 50-member staff, and they needed a solution to help them accommodate their growing storage of data.

SOLUTION:

With the help of IT Authorities, the Florida Holocaust Museum was able to transition from an outdated IT infrastructure with disparate components to an up-to-date, top-tier infrastructure with enhanced security, storage, and support.

RESULTS:

- Now equipped with a faster network and access to greater storage to accommodate more data and media

- Implemented cloud-based disaster recovery to strengthen data loss prevention and cybersecurity

- Provides ongoing support and consultation
